Miller & Rhoads.

WEATHER FORECAST.—Wednesday showers.

\$10.00 To-day

For Suits Reduced from \$17.50 and \$18.50.

White Etamines and White Brilliantines—as dainty and fresh looking as if they'd arrived yesterday (all new Suits—and not soiled in the least).

The Etamines have an Eton Coat, made with a taffeta girdle and trimmed with braid and attached linen. The Skirt is pleated down the front.

The Brilliantine Suits have capes over the shoulders with side pleated Skirts trimmed with buttons. Very dressy Suits and certainly cheap enough in price to make themselves members of your wardrobe.

No White Lawn to Equal

Ours at 12 1-2c Yard.

We have plenty of Lawns at various prices and 40 inches wide like this one, but nowhere will you find anything in sheer quality cloth to equal ours at—

12 1-2c Yard.

Prove us on it.

Exceptionally Servicable

Toweling 10c Yard.

Homespun Russian Craze, eight inches wide and worth at least 12 1-2c yard. A little of it came to us at a bargain and we offer it at—

10c Yard.

See Our Ad. on Woman's Page This Evening's News Leader.

NEW CLUB IN MANCHESTER

Second Parker, Davis and Lamb Organization Formed Last Night.

MUCH FEELING MANIFESTED

Some Wanted Union With First Club—Harmony at Last.

Manchester Bureau, Times-Dispatch } No. 1102 Hull Street. }
A second Parker-Davis-Lamb Club in Manchester was organized last night with sixty-two members. Mr. R. L. Patram was elected temporary chairman.

Permanent officers were elected as follows:

President, J. B. Rudd; Vice-Presidents, First Ward, C. C. Jones; Second Ward, C. L. Pettit; Third Ward, C. A. Cox; Fourth Ward, B. M. Robertson; Secretary, W. C. Pulliam; Treasurer, J. G. Saunders; Sergeant-at-Arms, R. L. Patram.

The session lasted two hours, and though there was more or less feeling shown in some of the addresses, it ended in harmony.

Several motions were offered relative to union with the Democratic club organized Saturday night. After much argument the motion to appoint a committee of ten to confer with a like committee from the other club was carried. Mr. G. H. White, chairman of the committee, was present, and did all in his power to promote harmony.

The committee, as announced by the chairman, is composed of Messrs. W. L. Ferguson, J. G. Saunders, C. C. Jones, J. S. Wakefield, George F. Hall, B. M. Robertson, C. C. Cox, W. B. Bradley, W. E. Smith, E. J. Gallagher and C. L. Pettit.

Mr. Owens addressed the club by special invitation, and his remarks were well received and heartily applauded.

At 10 P. M. the club adjourned subject to the call of the conference committee, which is to meet the other to-night.

Water Commissioners.

The Water Commissioners met last night. Messrs. T. H. Betty, chairman, J. R. Green and C. S. Wells were present. As there were several important matters to come before them the board adjourned till a larger meeting might be had, transacting only routine business last night.

Selling Without License.

John Henley, an old negro, was in the Police Court yesterday morning, charged with peddling tobacco. The tobacco was produced in court and sold among the crowd. He was fined \$2 and costs, for lack of which he had to go back to the cage.

A dog, supposed to be mad, created quite a disturbance on Sunday, but was shot by Policeman Waymack before he did any damage.

Persons and Briefs.

Mr. A. L. Sanderson and his mother have gone to New England. They will stay there until about September 1st.

Miss Fannie Branch, Miss Lizzie Bradshaw and Miss Kittle Jones left yesterday for Miss Branch's home, in Suffolk.

Mr. J. W. Craze is rapidly recovering from the fall she had last Wednesday.

Mr. B. Staples and his family are at

the home of Mr. W. R. Staples, in Keyville, Va.

Messrs. Thomas B. Morton and Harvey McGea are at Ocean View.

At The Casino.

It is a gay, frolicsome, mirthful and harmonious organization presenting "The Knickerbocker Girl" in the Casino this week. People seem to realize that this is to be the farewell of the old and popular favorites—the Bijou Comedy Company.

When the curtain goes down Saturday night the company will have been seen here for the last time.

Last night the crowd was even larger than at the opening, when every seat in the house was sold before the curtain went up on the first act. The splendid company is seen at the Casino to-day at 2:30 o'clock, with the usual performance at night.

Two Bad Cuts.

William Holmes, colored, was badly cut on the head by a rock on Shagbark Slip yesterday afternoon. The ambulance was called, and his head was sewed up. He is now in the hospital.

Bar Room In Trouble.

C. J. Nagelmann, whose place is at 70 North Third Street, was yesterday arrested, on his charge of keeping a disorderly bar room. He was released on bail, for his appearance in the Police Court this morning.

Found Pocketbook.

A pocketbook containing a small sum of money was found on a street car yesterday by Detective Williams and turned over to the Chief of Police, where its owner may get it by identification.

Ill Juror Improving.

Mr. M. J. Mussen, the juror whose illness put an end to the first hearing of the Goode trial, has somewhat improved.

CORNER-STONE FOR THE NEW SCHOOL

Will Be Laid To-Day with Imposing Masonic Ceremonies.

The corner-stone of the new public school building will be laid at Third and Marshall Streets at 6 o'clock this evening, under Masonic auspices. The chief address will be made by Mayor-elect Carlton McCarthy, and Prof. James C. Howard will have charge of the music. The Master will form procession at the Masonic Temple, West Broad Street, and proceed to the scene of the ceremonies. All Master Masons are invited to join in the parade, whether members of Richmond Lodge, No. 10, or any other. Worshipful F. W. Stitt will preside.

Following is the program for the day:

Leave the Masonic Temple, Broad and Adams Streets, at 5:30 o'clock Wednesday afternoon.

Right Worshipful Fred Pleasant, marshal.

Aides—Tiler with drawn sword, W. J. Lynham.

Two stewards with white rods.

Master Masons—A past master with golden vessel containing corn.

Three Master Masons with square, level and plumb.

Two past masters with silver vessels, one containing oil and the other wine.

Treasurer and secretary—Worshipful J. V. Bligden and R. B. Bnead.

Five Master Masons carrying five orders.

Large light.

The Holy Bible, square and compasses.

Two large lights.

Acting district deputy grand master, Chaplain—The Rev. L. H. Mason.

Senior and Junior Wardens—W. Fred Richardson and A. E. Perkins.

Worshipful Master—Frank W. Stitt, supported by the senior and junior deacons, E. B. Thompson and T. Branch Adams.

Two stewards with white rods.

All those who expect to sing in the chorus are requested by Mr. James C. Howard to meet him at the site of the school at 6:45 this afternoon.

PURIFYING THE WATER

Dr. Levy Discusses Subject Before Academy of Medicine and Surgery.

AND AS TO CLARIFICATION

History and Prospective Benefits of the City's Settling Basin.

The Richmond Academy of Medicine and Surgery held an open session last night, at which there were present many of the faculty and Dr. Ernest C. Levy, address on the methods of purification of water. Despite the inclement weather, there were nearly a hundred persons present, and though Dr. Levy spoke for more than two hours, he was given the closest attention by all. A vote of thanks was extended the bacteriologist by the Academy for his very able, instructive and interesting discussion of a subject in which not the physicians of the city alone, but the public, are peculiarly interested.

In the course of his address Dr. Levy reviewed the history of the move for clear water in Richmond from its inception in 1890 to the present, when the movement is nearing consummation. The speaker illustrated the method of clarifying and purifying water, and showed the effects and the results obtained from the various methods. In the course of the address the speaker dispensed many popular theories as to water purifying itself, as to running water being purer than standing water, and as to clear water being purer and more wholesome than muddy or turbid water.

Well Illustrated.

In the course of his address Dr. Levy used stereoscopic views, greatly magnifying photographs, to show the topography and site of the settling basin now being constructed, and also to show the effects of storage in reducing the bacteria in water. Statistical tables were submitted to show what results might be accomplished by means of the city's prospective clear water plant in supplying the city with an abundance of practically clear water. His calculations as to the periods of muddy and clear water and the intervals between such periods were taken from actual data. The address was an exhaustive and very lucid presentation of the problem of clarifying and purifying water in large quantities, and treated every phase of the subject; the speaker's own researches and investigations being supplemented by the results obtained by the most eminent authorities.

Appearance Deceiving.

The speaker showed specimens of water which were undesirable from various causes. One of the most common was the turbidity of water from the spring in front of Bargmann's, which is caused by the water being run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous. According to analysis, which he had recently made, the solids in the water were 100 grains per gallon, while in the water from the spring, which is run through a pipe which he said, was, in spite of its good and attractive appearance, highly contaminated and dangerous.
